

Configuring Browser after Microsoft Internet Explorer Update

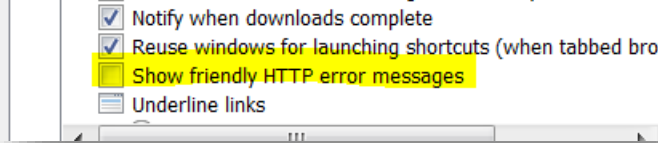

1. Close all browser windows.
2. Open Internet Explorer by **right-clicking** and run as administrator.
3. **Click on the Tool Menu (If you do not see the Tool menu, hit the Alt key).**
4. **Select Internet Options.**
5. **On the General tab, Browser History section, click Delete.**
6. **Select the following options and click Delete.**
 - Note: This will delete any saved login password data stored in the browser. If you don't want to delete the saved passwords, uncheck the Passwords checkbox.

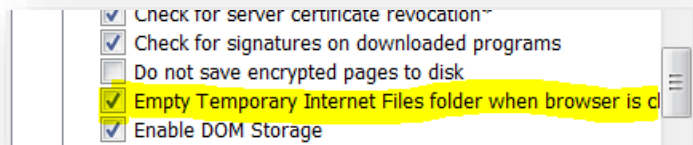

- Click the **OK** button.

7. Click on the **Tool** Menu (If you do not see the Tool menu, hit the **Alt** key).

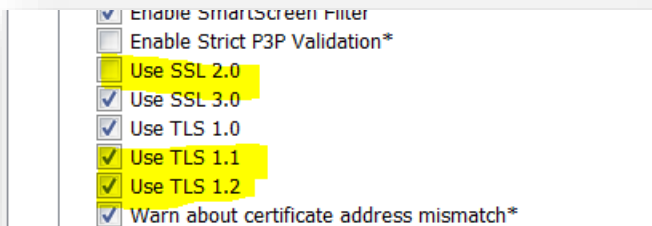

- Then, select **Internet Options | Advanced**
- Uncheck **Show friendly HTTP error messages**

- Check **Empty Temporary Internet Files folder when browser is closed.**

- Uncheck **Use SSL 2.0.**
- Check **Uses TSL 1.1** and **Uses TSL 1.2.**

8. Close all browser windows.
